

# NOTICE

In collaboration with the Domestic Banks, the Central Bank of Belize (CBB) launched a modern, national payment system, named Automated Payment and Securities Settlement System (APSSS), in October 2016. This was a major accomplishment in the effort to reform payments in Belize. The CBB owns and operates the APSSS and all banks are connected to APSSS through a robust and secure network. National Bank of Belize (NBB) uses the APSSS to conduct fast and safe transactions for our customers, either through our *i* Banking platform or over the counter.

Effective July 1, 2019 the CBB will start charging for transactions processed by APSSS; therefore, NBB will make the following changes to our fees for services provided using the APSSS.
